

Installation guide the lantern for Jaws Premium/LE machines

1. Pull playfield out to where rubber stoppers are resting on front edge of cabinet.
- 2.
3. Locate the stock plastic cover of the LED on the upper playfield

4. unscrew the plastic with a Phillips screwdriver, holding the lock nut from below with a small pair of pliers

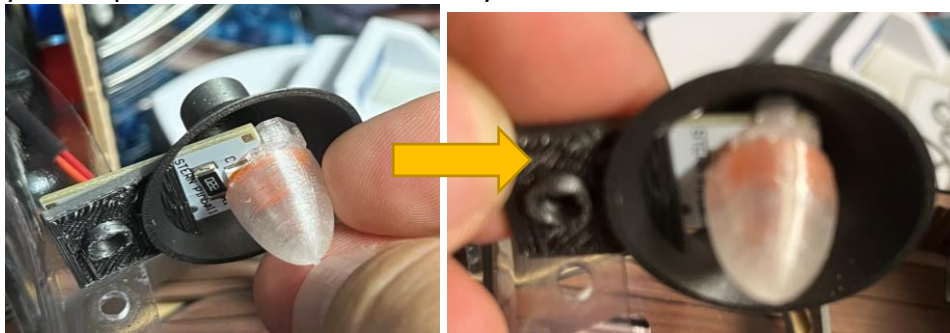

5. remove the spacer, the lock nut and the screw
6. take the lampshade and insert the LED board through the recess

7. now take the sculpted bulb and press it firmly onto the LED from the front until it goes no further. hold the LED board at a slight angle through the lampshade so that you can press on the bulb more easily

8. take the lamp cover and place it on the led board. insert the screw from above through the lamp cover, led board and lamp

9. now insert the screw through the hole in the ramp. from the underside, place the spacer on the bolt and screw on the lock nut

10. make sure that the cover is nicely parallel to the lampshade and don't overtighten the nut. it should now look like this

11. You're done – enjoy your game and crank out some high scores 😊
